

Mica Strip Heaters

Versatile, efficient and economical, the Mica Strip Heater is of the same construction as the Mica Heater Band in a flat design. Because of the range of dimensions and configurations possible, these units furnish even heat distribution for use in hot plates, sealing equipment, hot stamping, dies and molds and hundreds of other surface heating applications.

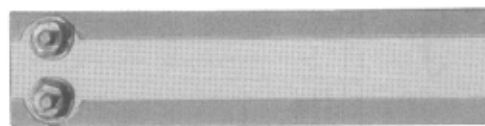

Type L1 - Widths over 3/4"

Type L2 - Widths over 1"

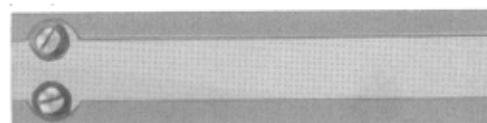

Type T1 - Requires 1" cold section on each end widths over 1"

Type T2 - Widths over 1-1/2". Requires 1-1/2" cold section on terminal end

Type T3 - Requires 1-3/4" cold section on terminal end

Type B2 - Tapped terminals

Full Case - For use where surface contact on both sides of heater is required

Mica Strip Heaters are also available with lead modifications as shown in the Mica Heater Band section
